Servicing The Greater Seattle Area and Beyond

COMPANY OVERVIEW

I am a photographer specializing in construction and architectural photography. I have been a photographer since 2016, and hold 10 years of experience working in construction for a wide variety of federal, state and local municipalities across the United States. I now service a wide variety of clients in varying industries including construction, commercial, real estate and marketing. I use my dynamic range of skills, knowledge, and experience in these industries to capture photos from an *application based* approach (i.e. project write up, internal and external circulation, social media and press release etc.) by considering the overall scope, personnel, and magnitude of a project.

WHAT I DO

Do you ever go on a website and say to yourself: "These photos simply don't do that project any justice". Well that's what I do - **I help clients capture photos that do justice to the quality and magnitude of the work they provide.**

Denny Way Substation(Final Project Photos September 2019)

TESTIMONIALS

RS&H	Fairwood G&CC
<p>“Katie worked with RS&H on several project shoots last year and captured the true essence of our work in the A/E/C industry. She has an artistic eye through the camera lens, is delightful to work with, and highly recommended.”</p>	<p>Katie has a fantastic eye for catching dramatic and artistic images. The photos she took of the Fairwood Golf Course and facilities are fantastic and much-needed additions to our collection. We use them for graphic design, our website, marketing materials, and much more. She was able to capture images of the golf course during the morning hours, which resulted in some stunning shots we are thrilled to use for our marketing purposes. In addition, she was very flexible and easy to work with for all of our staff and was able to get the work done despite some staffing and rescheduling issues to work around. She did a great job, I would highly recommend Katie for your project or special event!"</p>
